Certificate / Certificat Zertifikat / 合格証

VEC 1811045 C003

exida hereby confirms that the:

PC-lint Plus C/C++ Static Analysis Tool Version 2025 SP1 Vector Informatik, GmbH Stuttgart, Germany

Has been assessed per the relevant requirements of:
IEC 62304:2015

and meets requirements providing a level of integrity to:
PC-lint Plus - SIL 4 Qualified

Tool Functions:

The PC-lint Plus Static Analysis Tool is used to detect and report various conditions and errata in C and C++ source code including program defects and deviations from established practices and coding guidelines.

Application Restrictions:

The tool must be used under the same constraints, operating conditions and environments used in the validation of the tool. These are documented in the referenced Assessment Report and in the product user manual.
